Executive Summary

- ✓ PMO Director and Senior Program Manager with 15+ years of architecting and spearheading multi-million-dollar Digital Transformation and Cloud Migration initiatives for global enterprises, primarily in Japan
- ✓ Successfully delivered multiple major enterprise applications, some of which generating a combined 32M+ JPY YoY (approx. \$240K USD) in annual profit/expense reduction for Rakuten Corporate IT.
- ✓ Directed a \$25M cloud migration program for a major insurance tech platform, delivering an ROI exceeding 8% through capital expense reduction and achieving comprehensive client satisfaction.
- ✓ Established a high-performing technology team at Wells Fargo and devised an automation solution that reduced time consumption by over 85% while maintaining a 90% accuracy rate.
- ✓ Co-founded an ERP product start-up for the logistics industry, revolutionizing the local market by leveraging a new licensing model to drive a 15% increase in revenue and 28% increase in customer satisfaction, with a 2x faster turnaround time, demonstrating full-cycle business ownership.

Experience

Senior Manager / PMO Director

Jan 2025 to Present

Renesas Electronics Corporation, Tokyo, Japan

- † Architected and led the establishment of a PMO Center of Excellence (CoE), institutionalizing a comprehensive enterprise-wide project management framework that directly drove organizational delivery maturity and consistency across complex programs, including M&A integrations.
- † Defined strategic objectives and executed the organizational restructuring necessary to build the PMO from ground up, aligning delivery teams with the new enterprise landscape.
- † Directed end-to-end IT project management for complex initiatives including M&A integrations, ensuring seamless system transitions, on-time delivery, and strong business alignment.
- † Developed and executed strategic plans, managed cross-functional teams, and maintained strong stakeholder engagement to deliver programs & projects on-time and within budget.

Senior Program Manager (PMO & Project Design)

Aug 2020 to Dec 2024

Rakuten Group Inc, Tokyo, Japan

- † Led a distributed team of Product Managers and tech experts for Rakuten's Corporate IT; managed a portfolio of Enterprise application products and owned strategic initiatives aligned with organizational goals.
- † Directed the full project lifecycle (Plan, Organize, Direct, Control and Evaluate) for in-house development projects and information systems.
- † Successfully launched 3 major capitalizable enterprise applications for 8000+ concurrent users with <150ms latency, resulting in a 5.2mn JPY YoY and another 27.12mn JPY profit via expense reduction.

Senior Manager – Technology (IT Strategy & Service Delivery)

Nov 2018 to Jun 2020

Synechron Technologies Japan K.K, Tokyo, Japan

Client: Asurion Japan

- † Led a \$25M Digital Transformation / Cloud Migration Program for the insurance tech platform of two major Japanese telecom operators, managing a distributed, cross-functional team of tech experts.
- † Served as a Chief of Service Delivery, outlining the strategic plan and controlling budget, resources, and deliverables to ensure all program objectives were met.
- † Delivered key projects, including the development of a web-based insurance claims system and comprehensive data migration, utilizing end-to-end AWS architecture and DevOps infrastructure management.

Manager – Technology (Product Portfolio Management)

Nov 2017 to Oct 2018

Synechron Technologies India Pvt. Ltd, Bengaluru, India

Client: Wells Fargo

- † Instrumental in establishing an IT Products Security Compliance Center of Excellence (CoE) for the entire bank's IT Operations, focusing on managing security and vulnerability across all software applications and IT Infrastructure.
- † Innovated and prototyped an automated solution (using web crawling/scripting) that reduced time consumption by over 85% and achieved a 90% output accuracy for compliance process.

Director | Co-Founder

Apr 2015 to Oct 2017

Y2K2 Content Management Solutions Pvt. Ltd, Chennai, India

- ┆ As Co-Founder and Technology Head, developed a logistics ERP product focused on Fleet Management and Vehicle Tracking solutions.
- ┆ Drove tangible business improvement for customers by leveraging the ERP's Data Analytics & Intelligent Reporting features to increase productivity and reduce costs.
- ┆ Achieved significant business results: 15% average revenue increase, 25% active customer conversion, and a 2x faster turnaround time within the first quarter of deployment.

Entrepreneurial Activities

Mar 2011 to Mar 2015

Independent Consultant, Chennai, India

- ┆ Organized, structured, and invested in bringing a technology startup to life, focusing on IT Infrastructure, Enterprise ERP Development, Content Management, and Knowledge Processing services.

Database Administrator

Oct 2010 to Dec 2010

Meritech Co., Ltd, Tokyo, Japan | Client: Nokia Siemens Networks

- ┆ Represented the offshore team as Onsite coordinator, successfully deploying and delivering a major telecom monitoring tool for a leading Japanese mobile network operator.

Senior Technical Support Executive

Jun 2005 to Aug 2006

Sutherland Global Services, Chennai, India | Client: Microsoft Corporation

- ┆ Served as a senior escalation and research engineer, providing technical support for Microsoft Windows XP to US and Canadian customers.

Skills & Expertise

Executive & Strategy: PMO Leadership & Center of Excellence (CoE) Establishment, Digital Transformation, Strategy Planning & Execution, M&A Integrations, Global Service Delivery, Entrepreneurship.

Program & Technical: Enterprise Portfolio & Program Management (ICT), Agile/Hybrid Methodologies, Large-Scale Cloud Migration (AWS), Enterprise Application Integration, Stakeholder Management, IT Governance.

Certifications & Credentials

- ✓ **PMP** Project Management Professional
- ✓ **PRINCE2** Foundation Certificate in Project Management
- ✓ **Agile Scrum Master**
- ✓ **ITIL v3** Foundation Certificate in IT Service Management
- ✓ Six Sigma Green Belt
- ✓ Certified Marketing Strategy Associate (SCMS-A) & Digital Marketing Associate (SCDM-A)
- ✓ RPA Developer Foundation Diploma from UiPath
- ✓ Microsoft Certified Professional (70-271)

Education

Master of Science (M.S)

Apr 2008 to Sep 2010

Waseda University | Tokyo, Japan | Major: Global Information and Telecommunication Studies

- ┆ Authored and presented a technical paper on 'A Novel Approach to Data Collection using CDMA in Under Water Wireless Acoustic Sensor Networks (UWASN)' at IEICE International Conference at Osaka Prefecture University, Japan.

Awards & Honors

Chief Guest for a National Conference

Mar 2016

R.M.K Engineering College • Chennai, India

- ┆ Was invited as a Chief Guest delivering the key note speech for "Sixth National Conference on information and Communication Engineering"

'Distinguished Alumnus of the IT Department' Award

Jan 2015

R.M.K Engineering College • Chennai, India

- ┆ Was awarded the distinguished alumnus of IT department and successful alumni.

KEY PROJECT PORTFOLIO

Project: Energy Tracker

Organization	: Rakuten Group Inc.
Functional Reporting Area	: Corporate IT Department
Approach / Methodology	: Hybrid
Project Budget	: Up to \$1Million
Job Title	: Senior Project Manager
Project Team Sizes	: 5 to 9
Project Duration	: July, 2022 to February 2023

Objective: To develop and deploy a data-driven application that empowers the business to manage and reduce energy consumption across facilities, enabling management to make informed decisions for a sustainable and green environment.

Summary: I led the end-to-end development and deployment of the Energy Tracker application, overseeing the entire project lifecycle (design, development, testing, and operations) for this critical corporate IT initiative. I was responsible for ensuring the solution delivered measurable business value by enabling stakeholders to:

- Categorize and calculate energy consumption (electricity, gas, fossil fuels) from multiple data sources.
- Visually analyze data through an intuitive filter application.
- Generate processed reports to identify which business entities and/or facilities consumed what amount of energy.

The outcome was instrumental in informing management decisions, directly contributing to energy reduction and advancing the company's green energy initiatives and sustainability goals.

Details: As Senior Project Manager, I successfully directed this 8-month Hybrid project within an 8-10 million JPY budget, leading a cross-functional team of 5-9 (including Developers, Testers, Product Manager, and Business Analyst). My core responsibility was to drive delivery by taking ownership of process and people management from inception to completion. This involved rigorous planning, organizing, directing, controlling, and evaluating the project to ensure the overall objective was met and stakeholder satisfaction was maintained by adhering to all committed timelines.

Project: SpaceStudio

Organization	: Rakuten Group Inc.
Functional Reporting Area	: Corporate IT Department
Approach / Methodology	: Agile
Project Budget	: \$15Million to \$25Million
Job Title	: Senior Project Manager
Project Team Sizes	: 10 to 14
Project Duration	: August, 2021 to August, 2022

Objective: 'SpaceStudio' is a facility management system whose primary purpose is to show a 2D layout of the entire office facility and all the spaces such as employee desks, printer area, meeting rooms, etc. It also had additional features that allows employees to book desks that are available.

Summary: I led this 12-month Agile initiative to develop SpaceStudio, an in-house facility management system. The core business objective was to replace a high-cost, third-party licensed solution with a custom-built product. I directed the project lifecycle for the platform, which provides an intuitive, real-time 2D office layout and a booking system for employees to easily locate and reserve available desks, thereby simplifying office management and enhancing employee productivity.

Details: As a Senior Project Manager, I successfully managed the delivery of Phase 1 within the 12-month duration, leading a cross-functional team of 10-14 professionals collaborating from India and Japan. The project's success eliminated the need for the existing third-party license, making the development investment the only cost, which successfully drove a direct saving of 31.78 million Japanese yen. I oversaw vigorous performance testing to ensure the platform could reliably handle over 8,000 active and concurrent user logins.

Project: EnrollMe

Organization	: Rakuten Group Inc.
Functional Reporting Area	: Corporate IT Department
Approach / Methodology	: Agile
Project Budget	: Up to \$1Million
Job Title	: Senior Project Manager
Project Team Sizes	: 5 to 9
Project Duration	: December, 2020 to November, 2021

Objective: 'EnrollMe' is an Event Management System whose primary focus is to create and manage Covid-19 vaccination events for company employees. The idea is to build a web application where employees can login and book a schedule and choose a slot that is convenient for them to visit the vaccination facility and help management track it effectively.

Summary: I directed this 12-month Agile initiative to develop 'EnrollMe,' a web-based Event Management System for company-wide health events, including COVID-19 vaccinations. As the Senior Project Manager, I oversaw the entire platform lifecycle to deliver a system that streamlined scheduling, improved employee convenience, and provided employers with necessary tools to monitor workforce health and safety effectively. The platform was designed to be scalable for future general health check-up and flu-shot events.

Details: I successfully led the project team (5-9 members) through the full Agile methodology, focusing on planning, organizing, directing, controlling, and evaluating the project to meet strict stakeholder and timeline adherence. The platform underwent vigorous performance testing and an internal security audit. The project delivered significant ROI and productivity gains:

- **Productivity Increase:** Event creation time was dramatically reduced from 5.5 days to just 30 minutes.
- **Cost & Revenue Impact:** The project earned a direct profit of 217,333 JPY and projected an annual cost reduction estimate of 5,215,992 JPY.

Project: Horizon

Organization	: Synechron Technologies Japan K.K
Functional Reporting Area	: IT Department Service Delivery
Approach / Methodology	: Hybrid
Project Budget	: \$25Million or More
Job Title	: Senior Manager - Technology
Project Team Sizes	: 30+
Project Duration	: January, 2019 to June, 2020

Objective: "Horizon" project aimed to upgrade an existing on-premise legacy system to AWS cloud infrastructure while also including some new features on its course. The project is focused on digital transformation and cloud migration, aimed at enabling tech insurance providers to manage their insurance platform online for mobile handheld devices for telecom companies in Japan.

Summary: I led the \$25M Digital Transformation and Cloud Migration Program (Hybrid) to upgrade a major on-premise legacy system to an AWS cloud infrastructure. The primary objective was to enable insurance providers to manage their platforms online for two major telecom companies in Japan. I directed the development of the new web application, which was designed to streamline and automate insurance processes, significantly increasing efficiency and reducing operational costs for the providers while ensuring improved performance, enhanced security, and greater scalability in a cloud-based environment.

Details: As Senior Manager – Technology, I was responsible for delivering the fully functional application and achieving client satisfaction on this major program. I directed a large, global team of 30+ developers, testers, and managers, collaborating in real-time across India, the Philippines, and Japan. I managed the overall \$25 million budget, breaking the program down into multiple projects to effectively mitigate risks and maintain resource management. The final cloud-based application successfully passed performance testing to handle over 3,000 active and concurrent user logins.

--- End ---
