Technology & Data Governance: Enterprise Architecture Governance | Enterprise Data Management | Access & PII Governance | Regulatory & Security Compliance | IT Service & Operational Governance

Financial & Commercial Management: Portfolio Budgeting & Financial Controls | P&L Management | Total Cost of Ownership (TCO) | Vendor & Sourcing Management | FinOps | Benefits Realization & Value Tracking

Experience

Director of Global Project & Program Management [RENESAS ELECTRONICS CORPORATION, TOKYO] Jan 2025-Present

- **Global PMO CoE Establishment:** Established and institutionalized the Global PMO Center of Excellence (CoE), transitioning the organization from fragmented project execution towards a standardized, data-driven global governance model and defined roadmaps.
- **Business Function Technology Governance:** Partnered with Finance and HR stakeholders to assess shadow IT environments, identify business-critical technology dependencies, and align departmental technology practices with enterprise IT governance, risk management, and management policies.
- **M&A Integration & Organizational Alignment:** Directed technology integration governance for global acquisitions, partnering with Technology, Infrastructure, HR, Legal and business stakeholders on post-merger employee onboarding, organizational alignment and technology integration. Aligned integration roadmaps with business continuity, enterprise governance, and Japanese HQ requirements.
- **Legal, Data Governance & Regulatory Alignment:** Partnered with Legal and business stakeholders to incorporate data-access policies, PII protection, data governance controls, and applicable legal restrictions into post-merger integration and divestiture strategies, ensuring technology integration decisions remained compliant with enterprise policies and regulatory obligations.
- **Global Governance Framework & Executive Reporting:** Developed the Global Project Management Toolkit, comprising governance frameworks, execution playbooks, and Jira automation, establishing a consistent source of project information across global portfolios. Introduced a Governance-as-a-Service model with standardized KPI reporting across JAPAC, EMEA, and North America improving executive visibility, delivery predictability, and cross-functional transparency.

Senior Program Manager (Projects Design) [RAKUTEN GROUP INC. TOKYO] Aug 2020 to Dec 2024

- **Enterprise Program & Application Portfolio Leadership:** Led the planning, design, and execution of enterprise technology initiatives within Corporate IT, aligning business requirements, solution direction, delivery priorities, and

operational objectives. Coordinated cross-functional teams and stakeholders across Japan and India, overseeing delivery across Agile and Hybrid environments balancing technical debt, operational sustainability, and measurable business outcomes.

- **Enterprise Business Systems & Data Integration:** Led enterprise application initiatives supporting Finance, HR, and corporate operations, including Workday and SAP HANA-integrated solutions. Enabled standardized Finance master-data workflows, automated cost center generation and distribution, and enterprise data services for employee, project, and organizational information through governed APIs and controlled access processes.
- **Business Transformation & Operational Value:** Advanced internal application modernization and process optimization, replacing licensed third-party solutions with in-house platforms and improving enterprise service capabilities. Delivered ¥31.78M in cost savings, supported applications serving over 8,000 concurrent users, and in another product have reduced employee event creation time from 5.5 days to 30 minutes, with projected annual cost reductions of approximately ¥5.22M.
- **Enterprise Analytics & Sustainability Enablement:** Oversaw delivery of business-facing applications that improved organizational visibility and decision-making, including energy consumption analytics across electricity, gas, and fossil fuels. Enabled management to assess consumption patterns across business entities and facilities to support operational efficiency and corporate sustainability objectives.

Senior Manager – Technology (IT Strategy & Service Delivery) [SYNECHRON TECHNOLOGIES] Nov 2017 to Jun 2020

Client: Asurion Japan *(Tokyo, Japan)* | *Nov 2018 – Jun 2020*

- **Enterprise Cloud Transformation Leadership:** Directed Project Horizon, a $25M+ digital transformation and legacy-to-cloud migration program, modernizing a mission-critical insurance technology platform from on-premises infrastructure to AWS. Directed the delivery of new cloud-based application capabilities supporting the digital insurance services of two major Japanese telecom operators.
- **Global Program & Delivery Governance:** Managed a portfolio of interdependent projects under a phased delivery model, coordinating a global team of 35+ professionals across Japan, India, and the Philippines. Established delivery controls covering program planning, resource allocation, risk mitigation, and production readiness.
- **Financial Governance & Cloud Economics:** Managed the $25M+ program budget and implemented cost governance and infrastructure spend optimization practices, balancing financial controls with scalability and long-term cloud economics. Delivered a verified ROI of 8%+ through the transformation.
- **Mission-Critical Delivery & Executive Stakeholder Management:** Oversaw the transition of core insurance systems through phased production releases, achieving zero-downtime migration and successful performance validation for more than 3,000 concurrent users. Maintained 100% stakeholder satisfaction among Tier-1 Japanese telecom partners and translated technical delivery progress into business-value reporting for executive stakeholders.

Client: Wells Fargo *(Bengaluru, India)* | *Nov 2017 – Oct 2018*

- **Global Security Compliance Governance:** Led the IT Products Security Compliance Center of Excellence (CoE), centralizing vulnerability management and security governance across the global software portfolio. Established a strategic governance framework to address enterprise-wide security gaps and align compliance practices with global financial regulatory standards.
- **Compliance Automation & Operational Efficiency:** Delivered an automated compliance engine using custom intelligence tools, reducing manual compliance processing by 85% and achieving 90% accuracy in high-stakes security audits.

Director | Co-Founder [Y2K2 CONTENT MANAGEMENT SOLUTIONS PVT. LTD, INDIA] Mar 2011 to Oct 2017

- **Business & P&L Leadership:** Co-founded and directed an ERP solutions company, overseeing business operations, financial performance, and commercial strategy. Sustained 15% year-over-year revenue growth while maintaining profitability.
- **ERP Product Strategy & Development:** Directed product roadmaps, translating enterprise requirements into scalable ERP solutions supporting supply chain and financial workflows.
- **Operational Excellence & Customer Delivery:** Introduced a customer-focused delivery model and process improvements that doubled service turnaround speed. Established Master Service Agreements (MSAs) and drove the transition from manual workflows to digital business processes.
